### **DETAILED ACTION**

Claims 1-14, 1728 are pending.

#### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 5-9, 13, drawn to a composition comprising a peptide and a method for using the same.

Group II, claim(s) 2-4, 10-12, drawn to a composition comprising a peptide and another antigen, and a method for using the same.

Group III, claim(s) 14, 17-21, drawn to a method for delivering a cargo protein to an animal cell and a living cell comprising said peptide.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of using a peptide, such as SEQ ID NO: 1 to constitute a composition comprising a peptide or its functional equivalent thereof with SEQ ID NO: 1 has been taught by prior art as evidenced by Barney et al. (US Patent No. 6,258,782B1. Please see SEQ ID NO: 551) and (Coeffier et al. (Vaccine 2001, Vol. 19, pp. 684-693, see Table I). Therefor, the unity of the invention is destroyed by the disclosure of the prior art.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1). SEWQ ID NO: 1, 2). SEQ ID NO: 2, 3). SEQ ID NO: 3, 4). SEWQ ID NO: 4, 5). SEQ ID NO: 5, 6). SEQ ID NO: 6 and 7). SEQ ID NO: 7

Art Unit: 1648

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1, 9, 14, 21 and 28 comprising the species.

The following claim(s) are generic: 1, 9, 14, 21 and 28.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: one of the species of peptide sequence of SEQ ID NO: 1 or its functional equivalent has already disclosed in the prior art (Barney et al. US Patent No. 6,258,782B1. Please see SEQ ID NO: 551 and Coeffier et al. (Vaccine 2001, Vol. 19, pp. 684-693, see Table I). Therefore, the unity of the invention is destroyed by the disclosure of the prior art.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1648

8. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Qun Li whose telephone number is 571-272-0904. The examiner can normally be reached on 6:30 am to 3:30 pm.
